About me

💫 Front-end engineering is my dream job because it lets me blend creativity, a passion for programming, and a tendency for structure things.

📈 I create UIs that are accessible, responsive, consistent, and highly performant.

🧑‍💼 I take full ownership of my work and always strive to be reliable, hardworking, and committed to delivering top-quality results.

Keywords: UI/UX, Cross-browser Compatibility, Web Performance Optimization, Agile Methodology, Responsive Web Design, Web Accessibility (a11y), Git/GitHub
